

Software As A Service (SAAS)With a Purpose

JR.bizlink now heralds the ultimate information tool for small to medium sized business management

SAAS is a subscription based delivery model, allowing business flexible and uninterrupted access to systems over the internet

JR.bizlink's SAAS with a Purpose offers SMB's the following benefits over traditional systems:

- ✓ Decreased operating costs by automating finance management
- ✓ Reduced total cost of ownership (TCO) due to avoiding system infrastructure investments
- ✓ Faster time-to-value due to greatly reduced implementation times
- ✓ Accelerated feature delivery - on demand – scalable, as you need it
- ✓ Uninterrupted access to systems - anytime, from anywhere
- ✓ Failsafe disaster recovery and security procedures

JR.bizlink has provided SAAS based solutions to clients for 10 years. During this time the division has developed a successful team of professionals. The business and the team have earned a reputation for:

- A depth of industry understanding and knowledge
- Respected technical capabilities
- Commercial awareness
- A hard working committed approach to client service.

JR.bizlink are results focused and seek to enable efficiency improvements that extend well beyond the implementation of traditional solutions.

Time to Go SAAS with JR.bizlink
